iTrack123 Fleet Services are available to organisations who require multiple device tracking concurrently. Fleet services from iTrack123 allow sophisticated functions and customisations that can be tailored to suit the needs and requirements of the organisation.

iTrack123 Fleet Service Functions:

- Live tracking and alert updates on screen
- Multiple concurrent user access to monitor GPS tracking devices
- Multiple device tracking by a single user for fleet management
- Device groups for large scale device management

Subsystems for jobs, dispatching, wireless gateway access, passenger counting, traffic routing and more are available.

Please [contact iTrack123](#) to discuss your specific requirements.
